

# Trailer & Asset tracking

The **arvo.** system allows you to monitor both your valuable assets and your vehicles on one simple interface. Trailers, gensets, plant equipment

With accurate GPS positioning, utilisation reporting, maintenance notifications and much more, it helps you maintain your assets' security, value and effectiveness.

## Features.

### Live location.

Gain visibility into where your assets are with position updates every 60 seconds on the map.

See full journey, utilisation and activity histories to see precisely where and how your assets have been used.

### Enhance security & maintenance.

Set up POIs and geozones and be alerted to any unauthorised movement.

Schedule and manage maintenance tasks to keep your assets in good condition. Set up notifications based on odometer, engine hours or time.

### Robust asset tracker.

Our range of asset trackers are robust and smart with a wealth of features. All include:

- IP67, dust/waterproof and designed for harsh environments.
- Large rechargeable battery.
- European roaming SIM
- Configurable 'heartbeat' location update when asset not in use.

## Pricing.

Our pricing is always fair and competitive – call us today to learn more.
